DL English Design created the family law office of Winter & Ross in San Francisco, CA, to provide a calm environment for clients often feeling otherwise. The use of glass, openness, and warmth inspires a positive atmosphere to offset negative emotions often associated with difficult life situations. Upon arrival, clients are greeted with a glass-enclosed conference room and large-scale windows to provide expansive views of Treasure Island and the Bay Bridge. Clean, modern furniture pieces in white, cream, and warm-wood tones punctuate the space to create a feeling of safety. Eclectic fine art pieces from the owner's collection highlight the space to establish a sense of elegance with a dash of humor. The layout brings in an abundance of natural light to signify the prospect of new possibilities, life chapters, and relationships.
